

CAVARE

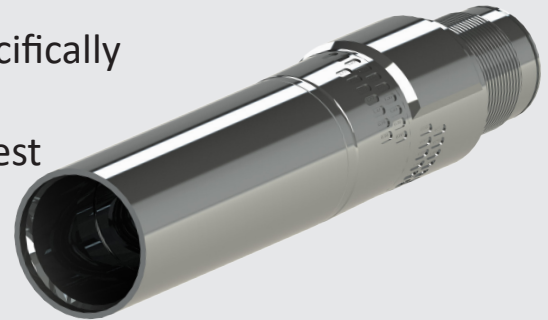

"Designing and Manufacturing Drilling Tools Since 1999"

EASY DRIVE™ AND EASY SET™

Cavare's Easy Drive™ is a drive system designed to handle today's high torque power sections. It incorporates sealed oil bath connections for extended component life significantly reducing repair and maintenance cost. The unique sealing system is shielded for protection against erosion and high LCM.

Cavare's Easy Set™ is an adjustable assembly specifically designed to house the Easy Drive™. Heavy wall thickness makes the Easy Set™ one of the strongest adjustable assemblies on the market.

Easy Drive™ and Easy Set™ can be incorporated into an existing fleet. To improve reliability and reduce your repair cost Cavare designs these components for ease of integration.
